

Contents

I. U.S.- Japan Cooperation

32nd Symposium Summary

II. Crustacean Disease and Pathology

The Penaeid Shrimp Viral Pandemics due to IHHNV, WSSV, TSV and YHV: History in the Americas and Current Status

D. Lightner

Occurrence and Prevention of White Spot Syndrome (WSSV) in Malaysia

N. Oseko

Disease Prevention Strategies for Penaeid Shrimp Culture

S. Moss, S. Arce, D. Moss, C. Otoshi

Trophic Value of the Unicellular Diatom *Phaeodactylum tricornutum* for Larvae of Kuruma Prawn, *Penaeus japonicus*

M. Okauchi, M. Tokuda

Application of Biosecurity in Aquaculture Production Systems

C.S. Lee

The Impact of Diseases on Crab and Lobster Fisheries (abstract)

J. Shields

Crustacean Hyperglycemic Hormone and Hemolymph Metabolites: Stress Responses in Two Lobster Species

E. Chang, D. Neil, G. Stentiford, S. Chang

III. Mollusk Culture

Feeding Ecology of an Abalone, *Haliotis discus hannai*, in Their Early Life Stages

H. Takami

Patterns, causes, and prevention of the mass mortality of juvenile blacklip pearl oyster *Pinctada margaritifera* (L.) cultured in Okinawa, subtropical Japan

T. Kurihara et al

Relationship Between Environmental Food and Glycogen Contents in Pen Shells

T. Yurimoto, Y. Watanabe, S. Matsui, N. Yoshioka, H. Nasu, N. Tobase

IV. Sturgeon Culture and Other

Non-Invasive Surgery Techniques in Fish Research: A Review on Esophageal Intubation, Dorsal Aorta Cannulation, and Urinary Catheterization in Sturgeon

S. Hung and D. Tashjian

Primary Structures and Multiplicity of Pancreatic Hormone in Fish
T. Andoh

A Novel Bitter Amino Acid, Pulcherrimine Isolated From Sea Urchin Ovaries:
Relationship Between Maturation And Their Contents
Y. Murata

Blocks to Polyspermy in Fish: A Brief Review
K. Murata
